

Falco

Visitor Management System

The security requirements of company, school, condo, housing area and large organizations are challenging and growing increasingly. Visitors should be screened, registered, signed in quickly thru the system and allowed to visit only the relevant areas.

FMVS, provides comprehensive visitor registration, tracking, reporting, and access control integration to tracks your visitors effectively and efficiently.

- Fast and simple visitor registration for check-in and check-out
- Print professional looking visitor badges and visitor slip
- Easy and user friendly interface
- End user self customizable report, company logo and visitor report
- Integrated with door access controller
- Barcode scanning
- Business card, passport and visitor Image scanning (twain compliant scanners)
- Visitor report (with or without image)
- MyKad registration
- Email and SMS notification on visitor arrival
- Blacklisting of Visitors
- Visitor asset control
- Look and Feel Options at Design Time (multi theme)
