

# Call Points

## **CP-31/34 Series**

### **Reliable, Flexible, Conventional**

**CP-31/34 Series  
with Plastic Glass**

CP-31/34 series call point is a conventional call point that offers double pole, triple pole, or quadruple pole changeover contacts with normally open and closed connections. It is supplied with a breakable plastic glass element that produces no glass fragments to ensure safe and reliable operation. Available in various colors for your choice.

#### **Standard Features & Specifications**

- Operating voltage: 12~24 VDC
- Plastic glass operating element
- Contact resistance: 100mΩ
- Contact rating: 5A 125/250 VAC (for CP-31 series)  
1A/125VAC (for CP-34 series)
- Test key included
- Available in various colors (Green/Yellow/White/Red/Blue)

#### **CP-34GPBZ-LB Special Features**

- 12 or 24 VDC input terminal
- Built-in 80dB buzzer
- Blue/Red & Blue/Green backlight illuminations

#### **Patents, Approvals, and Listings**

- CE: 332113

## Wiring for CP-31/34 Series Call Points

The CP-31/34 series uses terminal block connectors and wiring to the relevant terminal blocks provides normally open or normally closed operation. When the plastic element is broken, the internal switches will change from NC to NO operation, triggering the connected devices.
